Press Release

RPF Associates, Inc. Celebrating 15-Year Anniversary

Northwood, New Hampshire, August 2, 2006: RPF Associates, Inc., (RPF) an environmental health and safety (EH&S) consulting and testing firm based in Northwood, New Hampshire, is celebrating their 15-year anniversary. RPF provides indoor air quality and mold assessments; construction safety; OSHA and EPA regulatory compliance services; and site inspections for asbestos, lead, and other environmental hazards. In addition, the RPF professional development group provides corporate health and safety training programs for clients throughout New England. Training programs are provided at client sites throughout New England and at the RPF Training Centers in Northwood, NH and Amesbury, MA.

RPF was formed in 1991 by Roger Francoeur, Principal at RPF. Roger was then joined by his brother Dennis N. Francoeur, Jr., CIH, CSP. Both Roger and Dennis have over 44 years of combined experience in the environmental health and safety field. In 1998, Roger was appointed by Governor Jeanne Shaheen to the State of New Hampshire Asbestos Abatement Advisory Committee. Dennis has served on the board of directors for the Health and Safety Council of NH and is a member of the ConsultSig Committee of the American Industrial Hygiene Association. The company's employees include several industrial hygiene technicians, certified safety professional, certified industrial hygienist, environmental health and safety instructors, and licensed asbestos and lead inspectors. Recent growth has been steady for the indoor air quality services, corporate safety, and EH&S training services. In particular, with the heightened awareness and public focus on indoor air quality, including mold and bacteria concerns in homes, workplaces, and schools RPF is experiencing a significant increase in requests for indoor air assessments and analysis. Since 1991, RPF has continued to prosper and looks forward to continued growth.

This year, RPF has completed several inspections and assessment for large-scale renovations at schools, hospitals, municipalities, and industrial sites in the New England area. Professional development contracts in progress or recently completed include programs for the University of New Hampshire, Freudenberg-NOK and the State of New Hampshire.
