## Summary of Key Technical Personnel

### Certifications:

- ABIH Certified Industrial Hygienists
- BCSP Certified Safety Professionals
- EPA Certified Asbestos and Lead Testing & Analysis
- EPA & OSHA Certified Training Programs
- Various Individual State Certifications

### Joseph Knapik, Technical Director

Joseph Knapik is a highly accomplished and proactive Industrial Hygiene and Safety management professional with over 20 years of hands-on experience. Joseph has demonstrated leadership in consulting services as an industrial EHS manager, successfully managing compliance programs, conducting exposure assessments, and implementing risk assessment strategies. He is skilled in developing and executing preventive and remedial actions, as well as effectively collaborating with executive teams to achieve organizational goals. With a strong background in industrial operations, he has previously served as a Process and Plant Manager in precision metal manufacturing and as a Quality Director in the fuel industry. Joseph is also experienced in ISO and EHS management systems, including pre-registration and audit preparation.

### Sean Smith, Operations Manager

Sean Smith's duties and responsibilities include monitoring and coordinating RPF's operations scheduling and personnel to ensure timely and efficient completion of projects. Sean provides technical support to field staff on regulatory compliance, customer interfacing, project progress, budgets and coordination, and technical equipment/media usage. This is in addition to providing environmental health and safety consulting and project management directly to clients throughout New England including educational systems, government, prime contractors, industrial sites, health care, and general construction settings.

### Brian Rempert - CIH, CSP

Brian Rempert has been responsible for providing H&S technical guidance to clients and employees and has supervised and mentored a team of twenty-five H&S professionals. He has significantly improved efficiency, safety knowledge, and managed safety programs, reducing workers' compensation costs, OSHA injuries, and auto accidents, saving millions of dollars. Brian has conducted over 500 OSHA compliance, industrial hygiene, and loss control audits, led injury prevention workshops, and provided noise monitoring and OSHA interpretation for workers' compensation cases. He contributed to a multi-year Corporate Settlement Agreement with OSHA, developing Lock-Out/Tag-Out procedures, machine-guarding solutions, and employee training. Brian has also served as an expert witness in OSHA compliance litigations related to industrial hygiene and employee safety cases.
